8. Take N-634 towards Santander, going through Carancos and, before reaching Infiesto, turn left towards Villaviciosa and reach the finish line.

SS 5-8-10: VILLAVICIOSA - COLUNGA. THE LONGEST ONE.

Without a doubt, the star stage of the second day. Nearly 30km of stage, starting at the old Miravalles until San Feliz, in which we will cross the little Tunnel to go down to Puente Agüera. Downward slope which has already give a few surprises in previous years with a few off road excursions, given that it demands a lot from the brakes.

After the junction, this year we have a new deviation taking us to the Carrandi road, this year with a lot of hairpins and a fast final section. Once into the famous road, the most difficult kilometers await us, slippery and in which the drivers must keep themselves in check if they don't want surprises. Arriving to Libardón and, after the junction, we will go up to Alto de la Llama, to finish the stage with a couple of kilometers of chained bends in the shadow.
